

What *is* that stuff ?

The HazCat Chemical Identification System provides the answers you need - right now!

The HazCat Chemical Identification System can help you identify or characterize thousands of unknown or mislabeled substances.

The HazCat Chemical Identification System, Haztech Systems' flagship easy-to-use product, can be used on scene by anyone, not just chemists. **HazCat does the chemistry for you.** Further action then becomes a clearer path based on solid science, not a guess.

HazCat Chemical Identification System results plus contemporary emergency management strategy and tactics equals an unbeatable combination.

Use this compact, portable “lab in a box” to identify previously unknown hazardous and non-hazardous substances. Don't play the guessing game. By proving the identity or characteristics of a substance, you can work toward concluding the emergency.

The HazCat Chemical Identification System can be augmented with two accessory options for greater hazard identification power.

The **Meth Kit Option** is specific to illegal clandestine methamphetamine labs and their associated chemicals and wastes.

Manage your emergency incident or waste site on more than a guess. Put the **HazCat Chemical Identification System** to work in your community today.

*Used by United States Army, Navy, Coast Guard, Fire Departments, Hazmat Teams and others. Visit our web site at www.hazcat.com.
