

HAZCAT INDUSTRIAL CHEMICAL IDENTIFICATION SYSTEMS

KT1209 Basic w/o pump or detector tubes

KT1206 w/Drager pump and detector tubes

KT1204 w/Gastec pump and detector tubes

These HazCat Chemical Identification Systems do the chemistry for you!!!

Each HazCat Chemical Identification System is designed specifically for immediate on-site identification or characterization of virtually any spilled or abandoned material – hazardous or non-hazardous. The HazCat Systems are completely portable and self-contained in a sturdy, easy-to-carry (20"x9"x18") ABS Pelican case. These kits are designed specifically for field use. The HazCat manual directs the user through logic charts and step-by-step instructions. There is no math and measurements are not required to be exact. There are enough supplies in the kit to do hundreds of tests. The ability to perform on-site analysis saves time and money.
