

HazCat® KT1220

Industrial Chemical Identification System includes Drager and Methamphetamine options

\$4,117.37 Plus shipping and handling

“HazCat® Chemical Identification Systems do the chemistry for you”

Each HazCat® Chemical Identification System is designed specifically for immediate on-site identification or characterization of virtually any spilled or abandoned hazardous or non-hazardous material. This System is completely portable and is designed and packed specifically for field use in a sturdy, self-contained 20” x 9” x 18” Pelican case that is easy-to-carry.

The included HazCat® Methamphetamine Chemical Identification System is designed specifically for immediate, on-site identification of chemicals and waste products associated with clandestine methamphetamine laboratories. Everything you need is in one complete package

HazCat® test procedures are simple to follow and easily performed by non-chemists. The manual clearly directs the user through the testing procedures with straightforward step-by-step instructions. Only approximate amounts of the unknown and reagents are necessary to obtain accurate results, with no math required. Low cost per test! There are enough supplies in the kit to perform hundreds of tests. Onsite analysis saves time, money and helps preserve evidence.
