

Introducing the *all new*

HazCat[®] 2.0!

Chemical Identification System

For over 25 years, HazCat[®] has been the most reliable name in hazardous materials detection and identification.

Whether it's a chemical or biological warfare agent, a dangerous industrial chemical, an ordinary household cleaning product, or simply a hoax, accurate and reliable substance identification is essential. Now, after years of research and development and thousands of loyal HazCat customers providing feedback on how to improve the system, we proudly announce the most comprehensive update of the HazCat[®] Chemical Identification System ever: **HazCat[®] 2.0!**

User Friendly

- new, easier to read flow charts
- completely rewritten user's manual

Colorimetric Accuracy

- first-time-ever color tables provided for easy colorimetric comparison

More Comprehensive

- identify mixed wastes, household products, commercial formulations & heavy metals
- identify even more substances than before-quickly & easily!

Although we will continue to support our legacy kits, the entire line of HazCat[®] Chemical Identification kits may be easily upgraded to KT1252 complete upgrade with new case or the KT1250 without case. The upgrade kits contain everything needed to convert older versions of the HazCat[®] Kit to the all new HazCat[®] 2.0. Call us about upgrading your HazCat[®] Kits to HazCat[®] 2.0 today!
